

Hi there

Thank you for your enquiry regarding charity skydiving courses.  
This is a great opportunity to raise funds for a good cause and to have the experience of a lifetime.

### Why choose Happy Staffie Rescue?

Happy Staffie Rescue is a charitable charity that was launched in 2009 and registered as a company limited by guarantee on 23rd June 2009. We were granted charitable status with the Charity Commission in November 2009. We have four unpaid directors and a team of volunteers who are helping us raise funds. It was started by a group of dog lovers that were already involved in dog welfare.

Unfortunately in recent years this breed has become one of the most unwanted types of dog due in some part to a minority of owners who have tried to use the breed not as a loving family member but as a status symbol. This in turn has hindered the image of the dog from a playful, happy breed to some kind of fighting dog – something that could not be further from the truth. Many people confuse the Staffie with the American Pit Bull Terrier and this again damages the Staffie reputation. It is worth remembering that in most cases the Staffie makes a wonderful family addition, good with children, often quiet and easy to train, with a distinct personality, a love of play and not too excessive to exercise.

Staffordshire Bull Terriers will end up in rescue for many different reasons. These can include abuse and neglect, abandonment, financial or circumstantial change or simply just not being wanted anymore. So many Staffies that enter rescue are still very young and have simply gone past that cute puppy stage. Many will also fall into the other unwanted dog group, the older dog, often supplanted by a new puppy in the family home.

## THE COURSES

### TANDEM COURSE

Tandem is arguably the best way to experience your first freefall! You get a 30 minute ground briefing on the equipment, exiting the aircraft, freefall and landing. You are then securely attached to an experienced tandem instructor with a 4-point harness system, and board the aircraft. The aircraft will normally climb to around 10 000 to 12 000 feet where you exit and begin to freefall. You will reach speeds of approximately 120 miles per hour. Your freefall ends at around 5 000 feet when the tandem instructor will deploy the main parachute and you begin your descent under canopy. This will last between 4 to 6 minutes as you fly towards your landing area. We have professional cameramen available to capture the moment. A video and photographs will be a lasting reminder of your day. The cost of video and 35mm stills vary from dropzone to dropzone, usually £80 to £100. Remember to ask for details when you arrive. The time of your jump will depend on weather and the number of jumpers attending the course. Expect to be at the dropzone for the day.

### RAPS COURSE

The RAPS (Ram-Air Progression System) course is a two day static line parachute course. On the first day you will receive ground training on equipment, aircraft exit, parachute control and landing. On the second day you will jump, weather permitting, using an advanced ram air square parachute. You will jump from around 3 500 feet. Your parachute is deployed automatically by the static line. Once your parachute is open and you have performed your safety checks, you will fly your parachute to the landing area. If you would like to continue on after this course, additional jumps are available from £27 to £35 each. Within another six to ten jumps you could be qualified to begin freefall. The course fee includes P6 membership to the British Parachute Association, third party insurance, all instruction, hire of parachutes, helmets, radios, altimeters, overalls, your aircraft ride and your first jump. **Spectators are welcome.**

## Guidance Notes

### Skydivers Medicals and Consent Forms

On the day of the jump all skydivers will be required to complete the British Parachute Association Student Parachutist Declaration of Fitness. If the jumper is over 40, or has a medical condition that may affect their ability to freefall or parachute safely then they will require a doctor's certificate to be completed in advance. If the skydiver is aged 16 or 17 they will need their parent or guardian to sign their medical form and a consent form. We will have enclosed the medical and consent forms if we knew you needed them, but if we have not and you now think it may be required then please let us know as soon as possible. Medicals and consent forms need to be kept by the skydiver and taken to the dropzone on the day.

### Organising a Group

If you are organising a group all our correspondence will be via yourself, but we will happily speak to any individuals if they wish to discuss something in person.

### Group Discounts and Special Offers

For group bookings the following discounts apply:

6-10 Jumpers - £10 per person  
11-19 Jumpers - £15 per person  
20-29 Jumpers - £20 per person  
30 Jumpers or more POA

Please ensure you quote this discount reference number on the booking form: **GPD** we will work out your discount and send you confirmation. **Discounts cannot be applied in conjunction with any other offer.**

### FAQ's Restrictions and Exclusions

**Age** – Minimum age 16 (16 and 17 with written consent from parent or guardian). Those over 50 will not usually be accepted for RAPS but there is no upper age limit for Tandem skydives. **Weight limit** – 96 kilos or 15 stones at most centres.

**Fitness and Health** - A fair level of fitness is required for AFF and RAPS but not necessarily for Tandem skydives. If you are over the age of 40 you will need your doctor's approval, we will send you the relevant documentation for your doctor to sign. Under the age of 40 you may sign a self declaration of fitness.

**Weather** - Skydiving is weather dependant! Cloud – Good visibility and broken cloud is required for all forms of skydiving, and the cloud base should be no lower than your parachute deployment altitude. Wind – The maximum ground speed for Tandems is 20kts and for Raps and AFF 15kts. Check with your chosen club the afternoon before or morning of your jump for a weather update, don't rely on TV or radio.

**Disabilities** - If you are disabled this does not mean you cannot skydive. Contact us for more details.

**Insurance** - On registration at the club on the day of your skydive you will automatically be covered by 3rd party insurance. If you would like to take further personal injury cover, we recommend Extreme +. You can contact them on 08456760700 or via [www.extremeplus.co.uk](http://www.extremeplus.co.uk). Please select UK Skydiving as "where you heard about us".

**Safety** - All our chosen clubs are regulated by the BPA British Parachute Association, to ensure that equipment and training is of the highest standards. All Student and Tandem skydivers wear a dual parachute system, where if the main parachute should fail there is a reserve parachute, which is easily deployed. Student and Tandem equipment are also fitted with an automatic reserve parachute-opening device (Cypres) this is in case of extreme emergency and this device is governed by speed and altitude.

**Glasses and Contacts** - Our goggles fit comfortably over your glasses, and contact lenses are no problem

**Breathing in freefall** - On exiting the aircraft you may gasp for breath for a second but will soon find yourself breathing normally.

**How fast will I fall?** - This varies, but you can expect to be falling around 120mph during freefall.

**What should I wear?** - If it's a cold day wrap up warm not bulky as you will be provided with a jumpsuit to wear over your clothes. On a hot day a t-shirt and trousers/shorts are ample. Trainers are recommended, do not wear any open toed shoes ie sandals. **We're here to help, so if you want more information please don't hesitate to get in touch.**
